

# Four-Button Keyboard

## Keystroke Reference

The key to fast typing is not looking at the keyboard. Similarly, the key to typing fast with Four-Button Keyboard is not looking at the buttons you're pressing or, especially, the status bar at the bottom of the screen. Like you've trained your fingers to hit the right keys on a keyboard, you must train your fingers to hit the right sequence of buttons. The four buttons of the Four-Button Keyboard are referred to with the letters a, b, c, and d. Here are the button sequences for all ISO Latin 1 characters.

Control Characters				Accents (ddcdd)				Int'l Punct (ddcdddd)	
Space	db	Tab	ddcddcbda					i	ddcdddda
